Barn 300

Open Pods

Design: Johan Kauppi

Barn 300

Open Pods

Design: Johan Kauppi

A muted pavilion, for meetings and work. The design has a clear horizontal expression, inspired by the landscape of Swedish Lapland. The system is based on identical acoustic baffles of fabric, mounted at consistent distances, giving the furniture a balanced combination of sound absorption and transparency, for large-scale repetition in public interiors.

DIMENSIONS

Width: 2366 mm
Depth 2300 mm
Height: 2945 mm
Weight: 400 kg

DESCRIPTION

Barn 300 has a white metal frame in 40 mm square tubes. The parts are coupled with hidden connection angles. 32 panels that form walls and roof are hooked onto the frame. The floor is a 15 mm single-piece parquet floor in white-painted ash wood. It is placed on the 40 mm frame and cellular plastic. Lamp hooks, cable ducts and a double power outlet are standard. The housing has a polyester felt to protect against the floor.

Panels: 19 mm Lightweight MDF with 6 mm polyether and fabric. Matching colours in fabric piping.

Metal frame: Powder coated NCS S 0500-N White
100% recyclable material.

Ask Air is a 1-pole floor with a refined expression in a clean, exclusive sorting and a light white shade. The four-sided microfase around each board highlights the classic shelf format. The ultra-matte surface minimizes the reflections of the light and allows the colour and feel of the floor to come to its fullness while protecting the wood from daily wear. Detailed Description - Naturally occurring variations in the wood colour are allowed. The product has medium, black twigs. The quays can vary in size and number.

Colour change - Coloured product, visible change over time.
Ultra-finished lacquer. Hardness (Brinell Value) 4.0

White grounded double outlet located at the center post on one side. Electrical connection must be done by a qualified electrician.

FABRIC AND PIPING

Look in Product sheet Fabric and piping.pdf for our standard fabrics

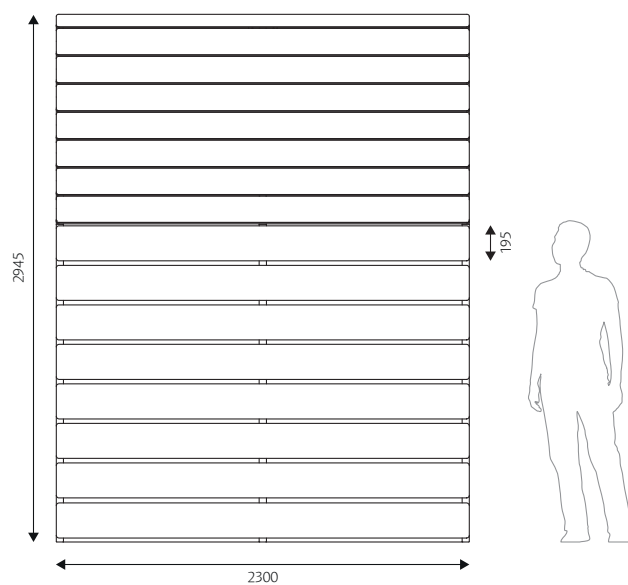

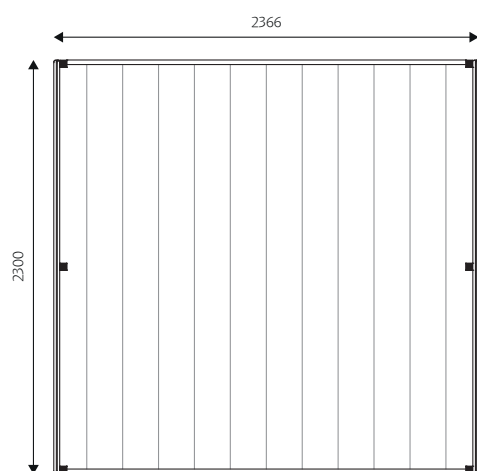

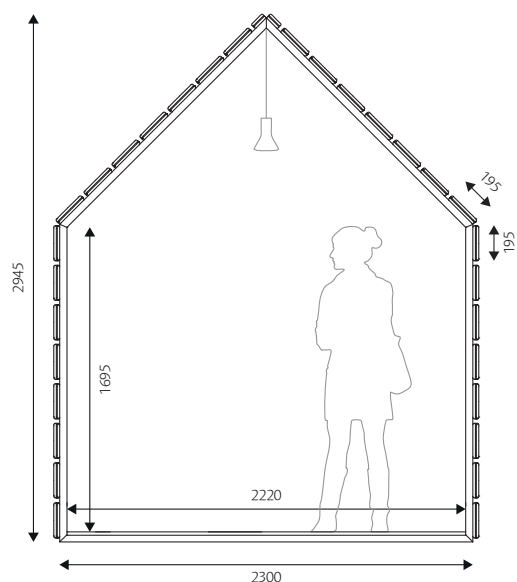

MOUNTING

The frame is screwed together with hidden connecting angles. The panels are hooked with neck braces on the outside of the body. The floor is dimensionally sized and clipped on top of cellular plastic and square tubes. An aluminum threshold frame is screwed along both edges.

Barn 235

Open Pods

Design: Kauppi & Kauppi

Barn 235

Open Pods

Design: Kauppi & Kauppi

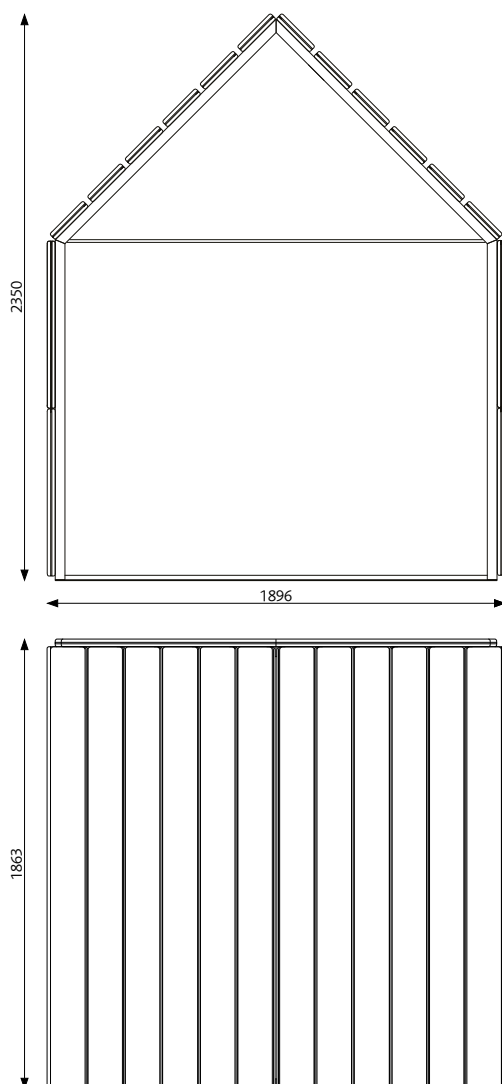

A stripped, slightly smaller / lower variant of Barn 270 which is developed for projects where the ceiling height is about 2.40 m. The design has a clear horizontal expression, inspired by the landscape of Swedish Lapland. The system is based on acoustic panels of fabric, mounted at consistent distances, giving the furniture a balanced combination of sound absorption and transparency, for large-scale repetition in public interiors. For Barn 235, there are fixed benches and desks that can also be supplemented afterwards.

DIMENSIONS

Barn 235

Width: 1896 mm
Depth: 1863 mm (incl gable)
1830 mm (excl gable)
Height: 2350 mm

DESCRIPTION

Barn 235 has a white metal frame in 40 mm square tubes which stands on a frame in flat iron. The parts are coupled with hidden connection angles. Panels that form walls and roof are hooked onto the frame.

Panels: 19 mm lightweight MDF with 6 mm polyether and fabric. The nails are covered with a decorative piping cord.

Metal frame: Powder coated NCS S 0500-N White
100% recyclable material.

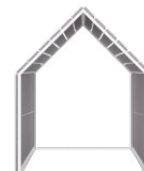

Mounting: (2 persons) ceiling height at least 240 cm

The frame is screwed together with hidden connecting angles. The panels are hooked with neck braces on the outside of the body. Full stability is achieved when all panels are mounted.

Fences

Acoustic floor screens

Design: Johan Kauppi

Fences

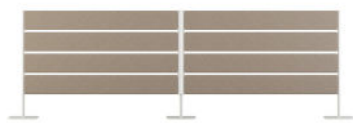

Acoustic floor screens

Design: Johan Kauppi

A family of repeatable room dividers, for meetings and work. The design has a clear horizontal expression, inspired by the landscape of Swedish Lapland. The system is based on identical acoustic baffles of fabric, mounted at consistent distances, giving the furniture a balanced combination of sound absorption and transparency, for large-scale repetition in public interiors.

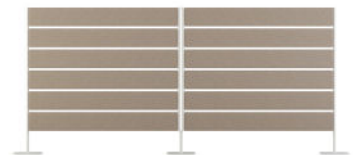

DIMENSIONS

Fences 4

Width: 1200, 1600 mm
Height: 1103 mm
Weight: 38 kg, 42 kg
Thickness: 33 mm (panels),
30 mm (pipes)

Fences 6

Width: 1200, 1600 mm
Height: 1550 mm
Weight: 46 kg, 54 kg
Thickness: 33 mm (panels),
30 mm (pipes)

DESCRIPTION

Fences has 4 or 6 sound absorbing panels that hooks up with air gap between 30 mm white powder coated pipes. Between the screens, there are connecting pipes and the outer edges have endpipes. Each pipe is mounted on a 300 mm rectangular metal plate.

Panels: 19 mm lightweight MDF coated with 6 mm polyether and fabric. Piping in matching color.

Metal frame: Powder-coated NCS S 0500-N White
100% recyclable materials.

FABRIC AND PIPING

Look in Product sheet Fabric and piping.pdf for our standard fabrics

MOUNTING

Fences: The panels with integrated brackets hatch quickly in the endpipe and coupling pipes with integrated coupling brackets. Then the feet are mounted and the screens can be raised to complete the assembly with the top and bottom coupling tabs.

OPTIONS

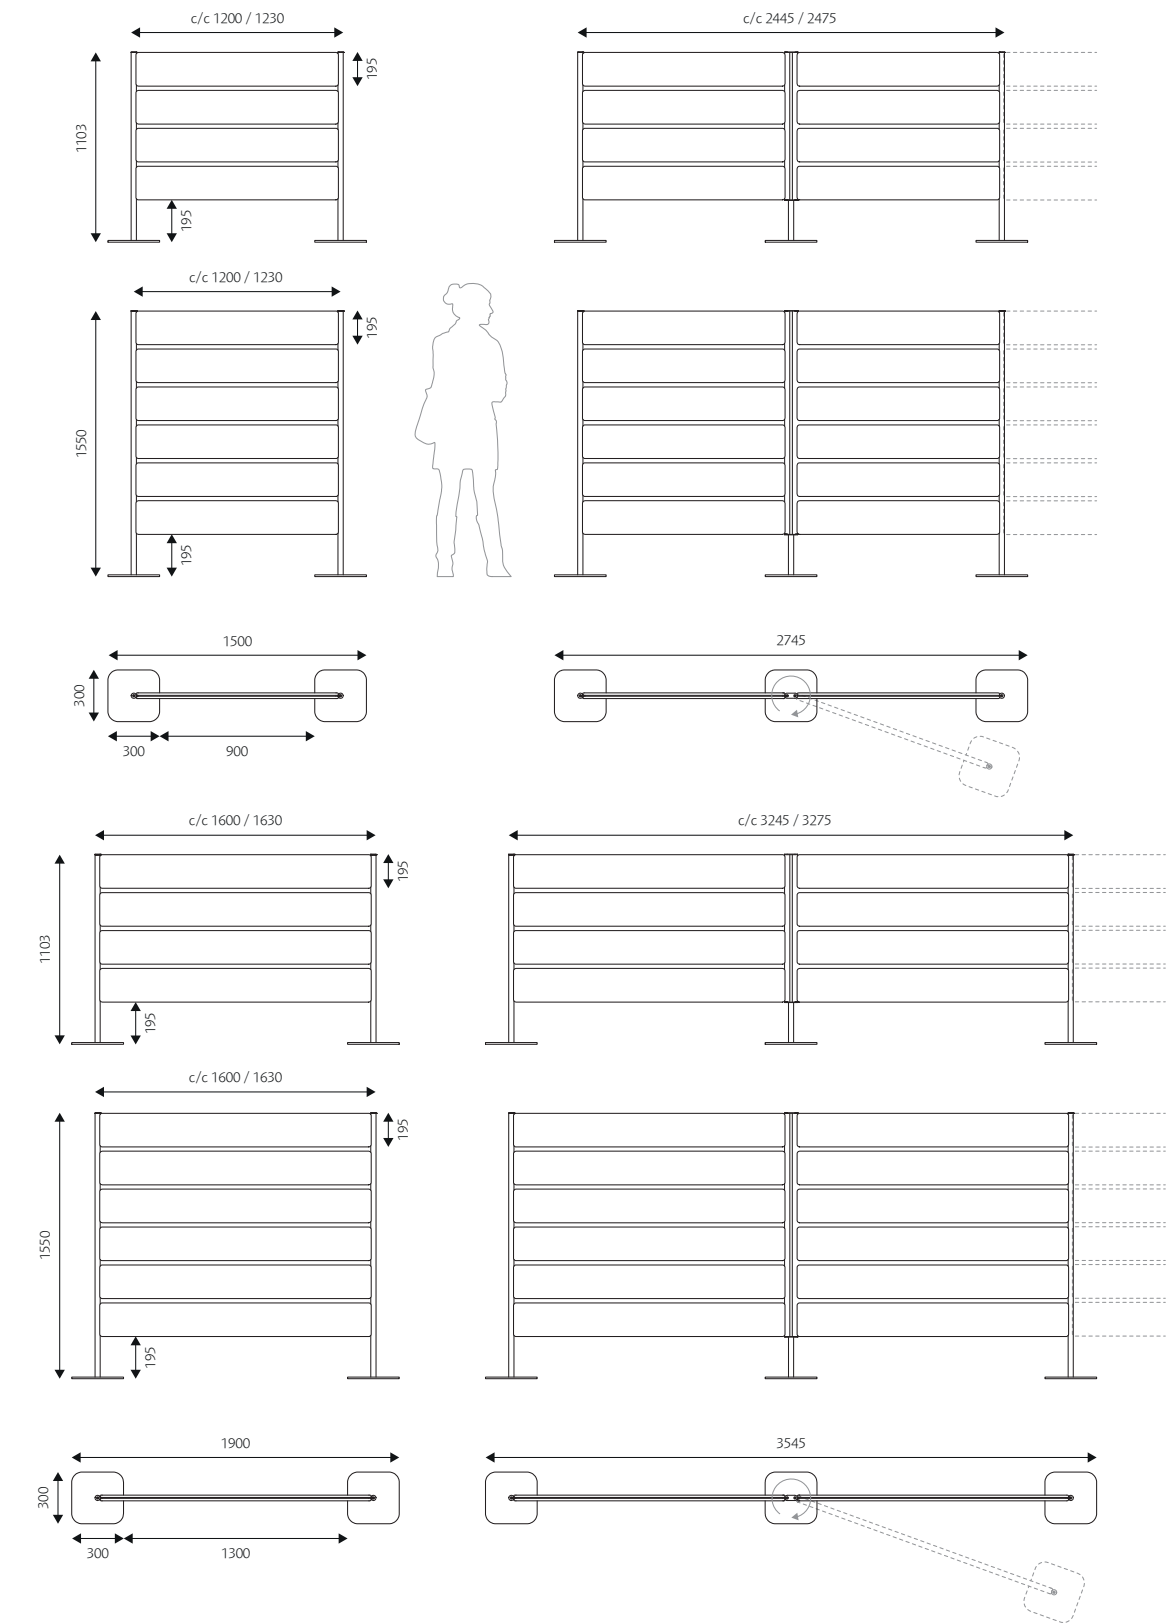

All Fence modules are also available with one solid baffle s.c. Fences Solid.
