CS5040 bio

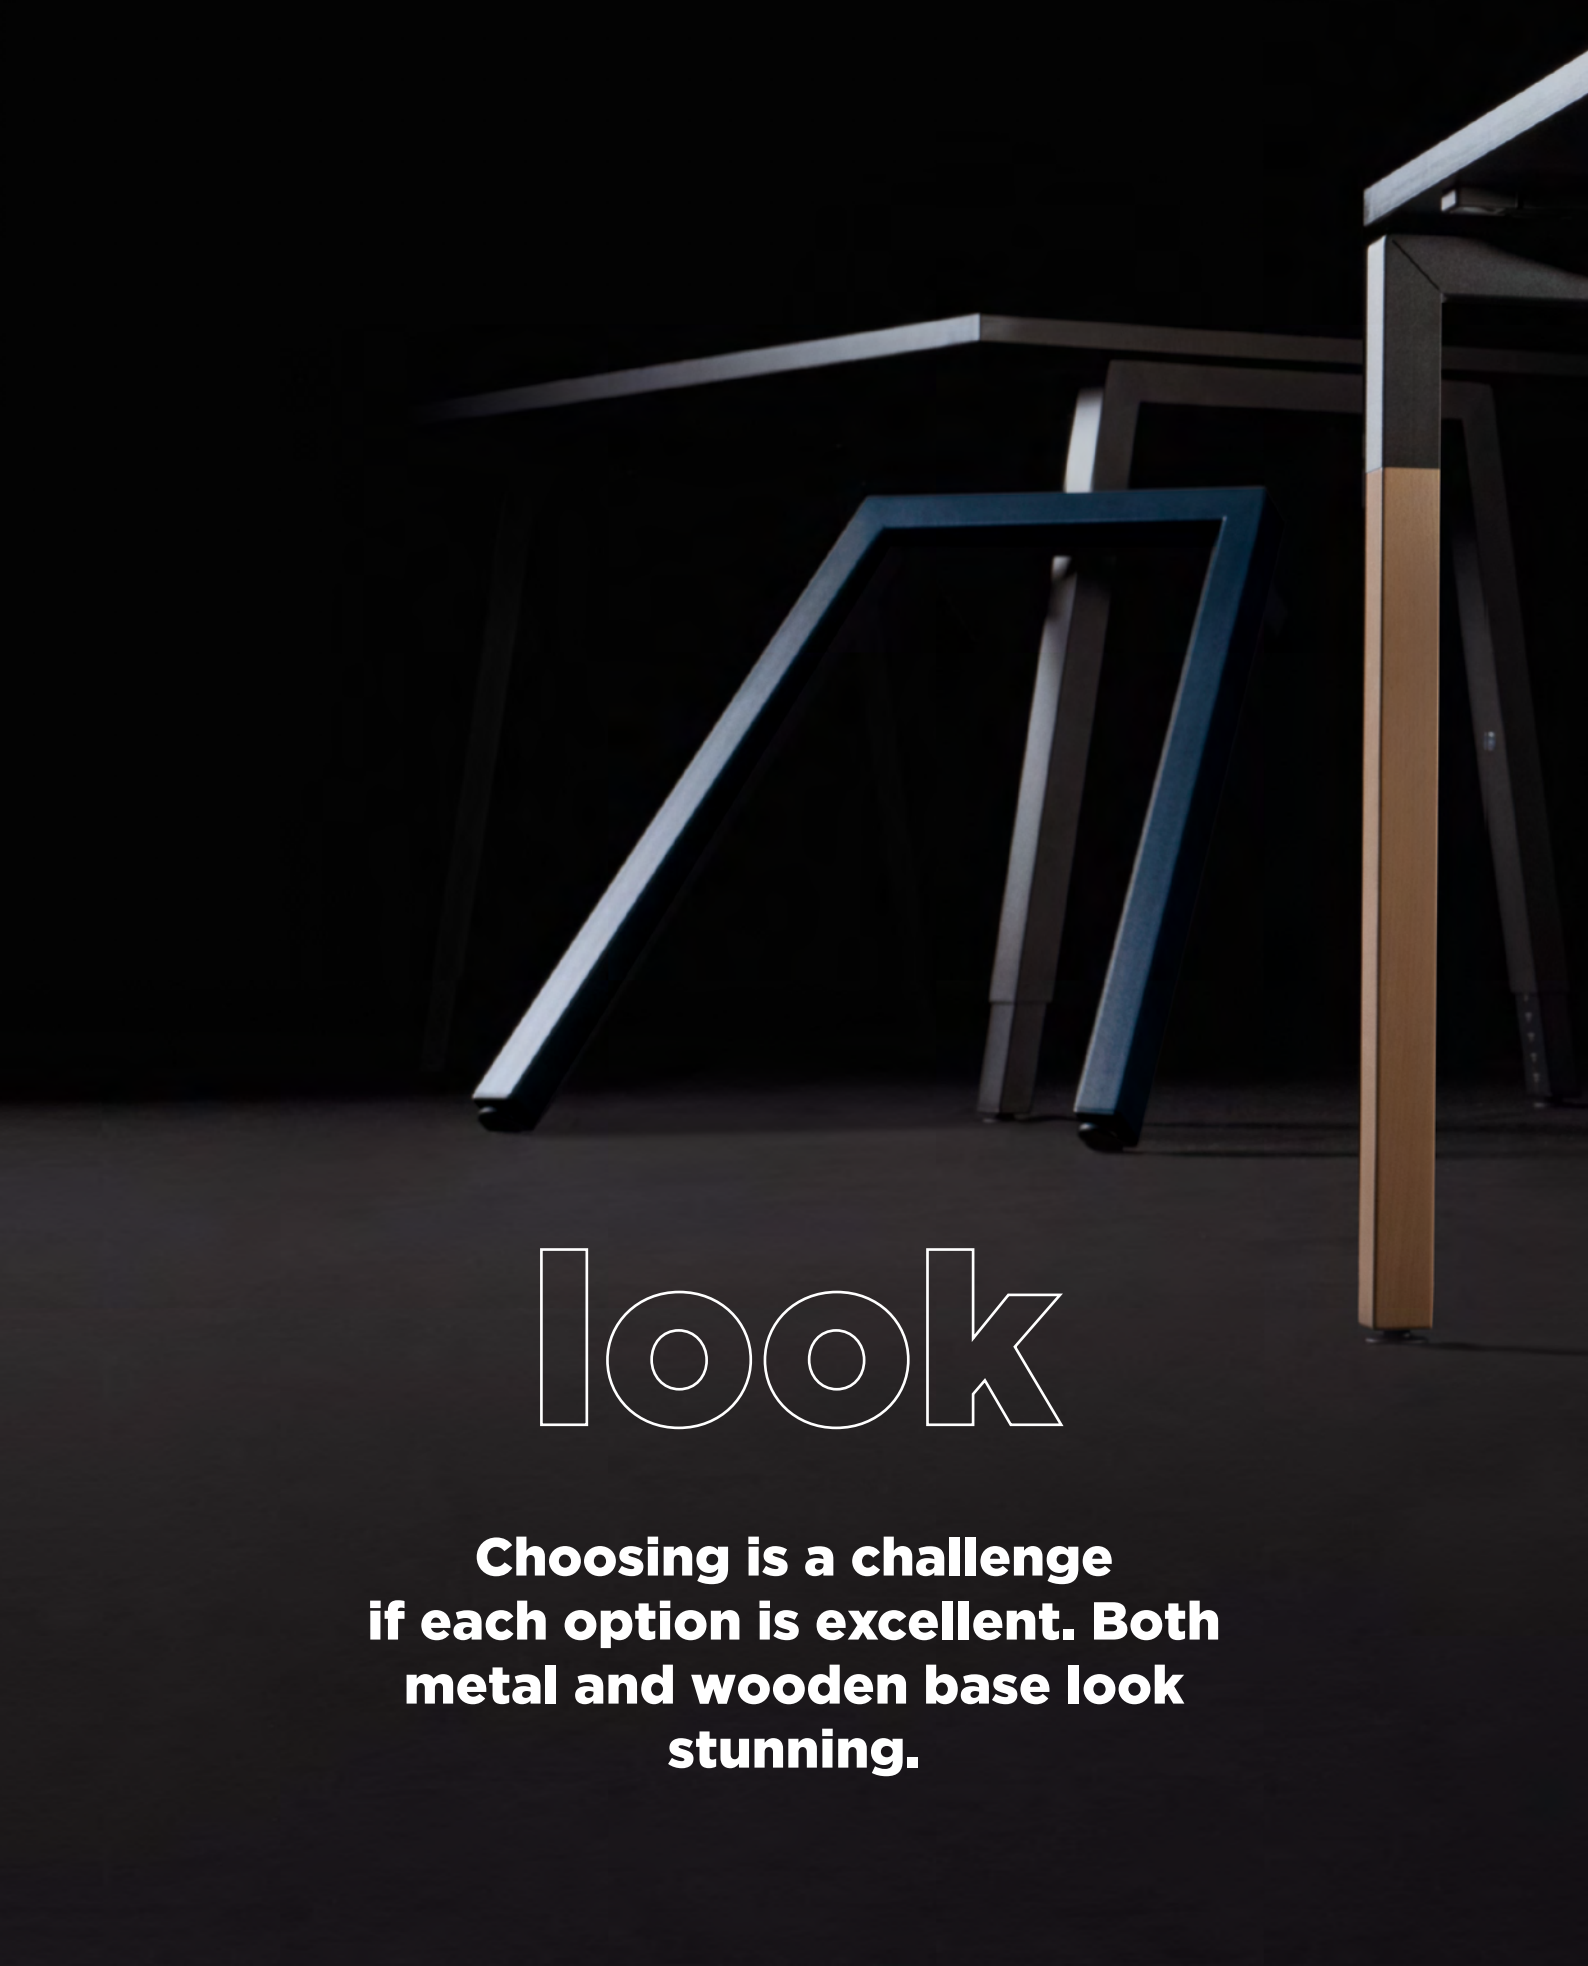
The CS5040 office furniture line appeared on the market in 2018 and has been consistently developed.

COMPACT

DESIGN

good design

covers many aspects but always starts with a wise idea.



look

Choosing is a challenge if each option is excellent. Both metal and wooden base look stunning.

Finishes: CC Black, RAL9005 Jet black, 1.007 Beech, MS Slate, RAL 7015 Slate grey, RAL 5008 Grey blue

Shape and colour catch the eye first. Regardless of the finish type, all desks, workbenches and tables can come with A-leg and 4-leg base.

Finishes: RAL 9016 Traffic white, 1.007 Beech

Black green
Grey blue
Cashmere
Traffic white
White aluminium
Slate grey
Jet black

privacy

Be sure your private space is well marked.

The upper panel for desks comes in two versions: fully upholstered or made of thermoformed PET felt. For workbenches only the upholstered version is available. Modesty panels for desks are made of melamine faced chipboard. Each panel can be mounted independently.

L’

quick access

Surround yourself with comfort-oriented design.

An organiser strip with accessories keep your belongings always at hand while cables — neatly hidden under the sliding table top — are invisible yet accessible.

storage

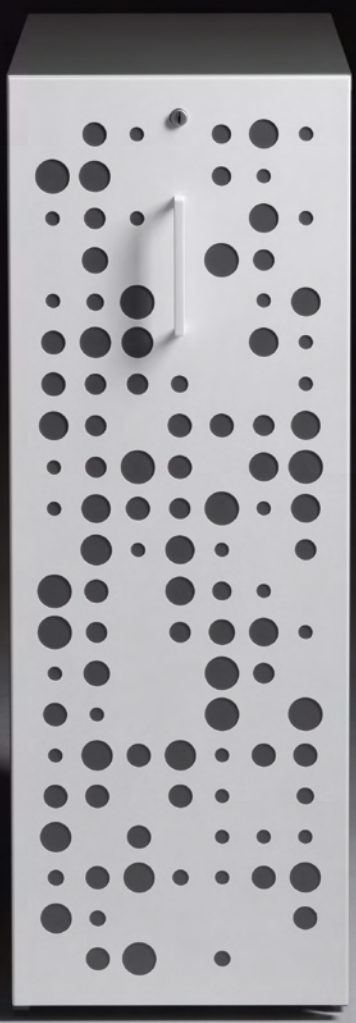
Keep close and safe all that's important.

Sideboard: freestanding or integrated with desk/workbench. Such a piece of furniture offers extra usable surface right beside your table top.

Finishes: CC Black, NK Cashmere, RAL 9005 Jet black

Finishes: MS Slate, BI White, RAL 9016 Traffic white, Felt FC01 Grey

Orga Tower: plenty of conveniently designed space. The upper level of the drawer can be optionally equipped with a felt organizer.



Sideboard and Orga Tower are two elements of CS5040 line distinguished by a decorative metal cover with round cut-outs.

vibe

Go for the style that fits you best.

Finishes: NZ Natural Hickory, RAL 9005 Jet black

Arranging spaces is all about reflecting people's mindset and personality. The CS5040 line goes perfectly well with all possible concepts.

Finishes: BI White, RAL 9016 Traffic white, 1.007 Beech

Finishes: CC Black, NZ Natural Hickory, RAL 9005 Jet black, 1.007 Beech

Finishes: NK Casmere, Cashmere NCS S 2005-Y60R

Office is people. Tables support meeting, talking and communication.

Office stands for a place where meetings are held. We fully agree with this concept, so we couldn't imagine the CS5040 line without high and conference tables.

Finishes: KO Blu Fes, RAL 5008 Grey blue; KR Verde Comodoro, RAL 6012 Black green

The range of finishes for tables emphasizes their usability. Beside melamine, the table tops can be finished in Fenix NTM® - an innovative laminate which is capable of thermal healing micro-scratches.

Finishes: BZ Grey Basalt, RAL 9005 Jet black, 1.007 Beech

Due to its extraordinary properties, Fenix NTM® is a finish dedicated to furniture used by plenty of users every day, just like in case of meeting tables.

Finishes: KO Blu Fes, RAL 5008 Grey blue

Finishes: KR Verde Comodoro, RAL 6012 Black green, KO Blu Fes, RAL 5008 Grey blue, NK Cashmere, NCS S 2005-Y60R Cashmere, 1007 Beech

SOLUTIONS

clever ideas

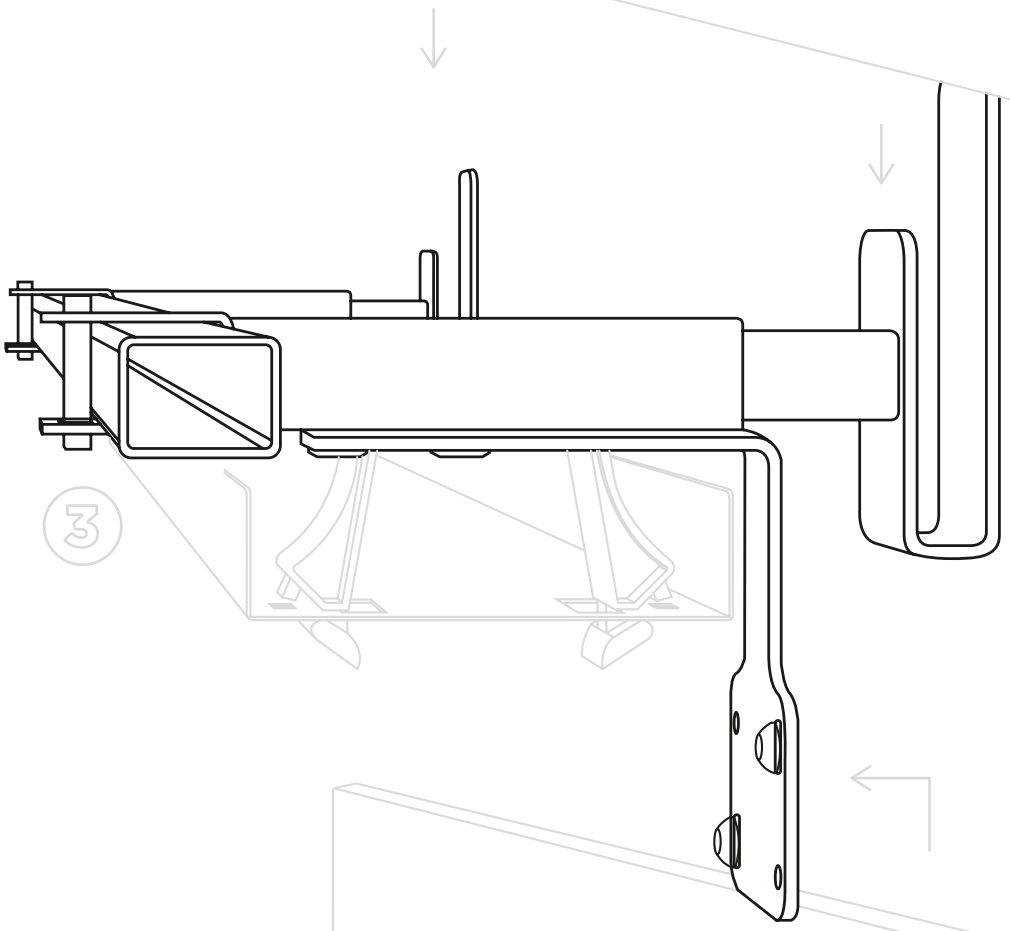
come true to make office life easier.

basic bracket

The solution so unique that deserved to be registered as an industrial design.

The basic bracket allows for simultaneous yet independent mounting of both panels and horizontal wire trunking. With this smart connection method no drilling is necessary, so the surface of the table top stays untouched.

The method of joining elements with basic bracket is an officially registered industrial design. Thanks to this solution, the mounting of panels and wire trunking has never been easier. What's more, each of mentioned elements can be mounted separately.



1. upper panel
2. modesty panel
3. horizontal wire trunking

2

media ports

**More power, less wires.
Plug in quickly and easily
while sitting at desk.**
