

FourLikes®

FourLikes® extensive range of modules can be configured and reconfigured to optimise spaces and activate underused areas.

Although the modules are based on cubes, the ingenious styling creates the perception of curvy and organic shapes. Everything has been considered, from the ideal working seating height to the provision of acoustic and visual privacy.

The FourLikes® Meet offers a private focusing or collaborating space, which can be integrated into larger arrangements of different seating options.

Sustainability

Upholstery on the FourLikes, depending on the type and colour will be available with EU Ecolabel or Oeko-Text certification.

- ISO 14001

Testing

- Testing info: EN16139

Quality and Enviroment

We are aware of our environmental responsibility and we strive to reduce our and our customer's impact on the environment by producing quality furniture in a sustainable manner.

Procurement

We procure materials from responsible suppliers who comply with our high standards, ensuring that the materials are sustainably sourced and managed, conforming to applicable laws and regulations such as legal logging and chemical restrictions.

Production

We are ISO14001 certified, guaranteeing excellent environmental standards of our manufacturing sites.

Use

A 5-year warranty on all products within our price list. This warranty covers breakage and damage of products occurring because of deficient craftsmanship performance under normal use. The warranty shall lapse if the product shows signs of mishandling abuse or other physical damage. The warranty does not cover those parts of the product which are exposed to abrasion during use.

Recycling

We are working towards the aim for all our products to be minimum 95% recyclable.

Products must be separated into their components and disposed of separately.

All metal parts can be disposed of and recycled by an approved organisation. Lacquered frames are treated with a paint classified as not dangerous according to directive 1999/45/EF.

Wood can either be recycled or incinerated.

Plastic shells can be recycled. The shell will be granulated and reused in new plastic production.

Upholstery and veneer shells are not recyclable but can be disposed of by incineration.
