# Turning good spaces into great experiences

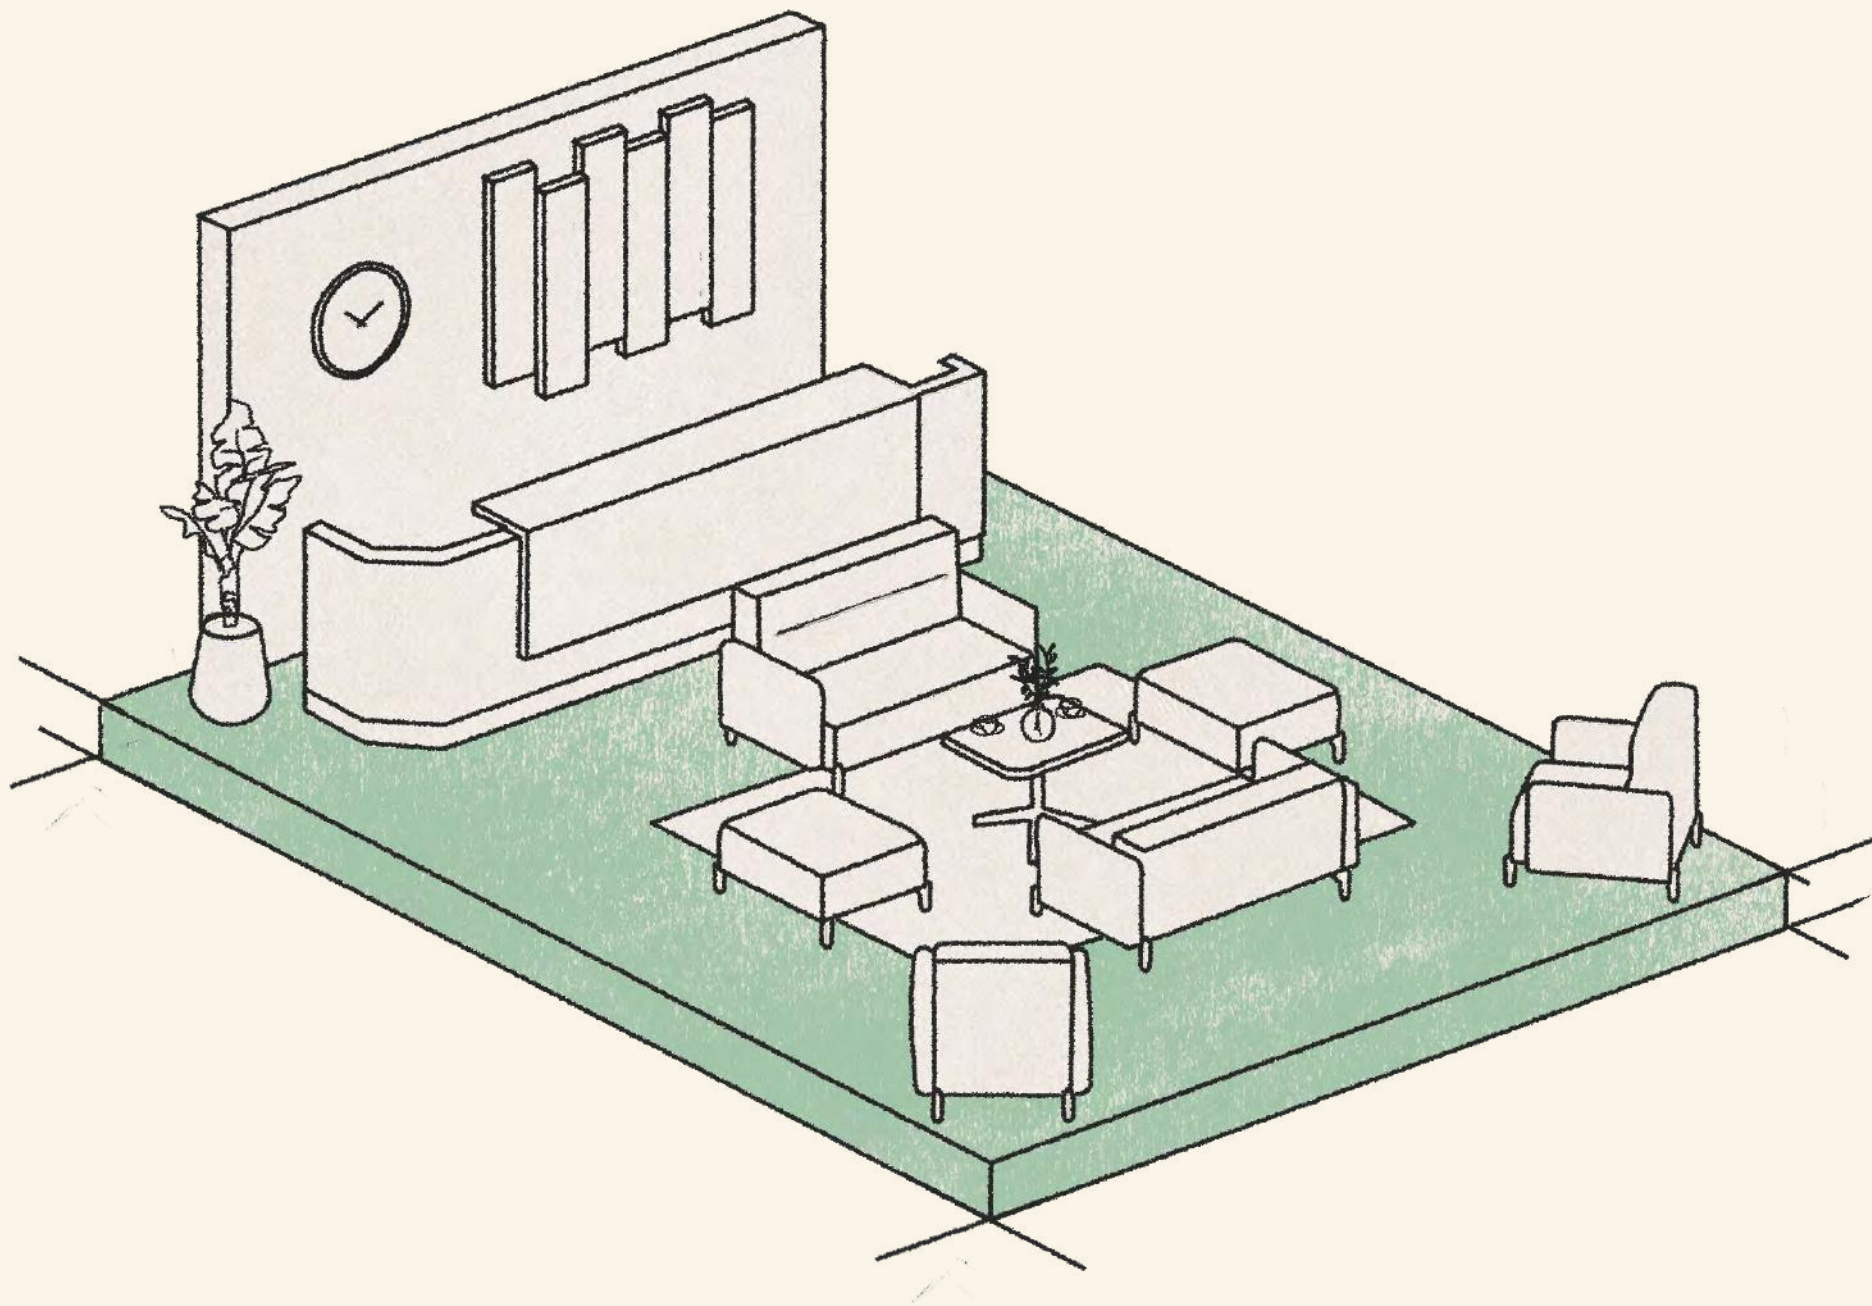

The contemporary office environment should be a space where everybody feels at a home, a series of micro neighbourhoods each with their own personality and functionality to support and develop individual and group work styles.

Each 'neighbourhood' has a unique vibe, whether it be laidback and buzzing or private and peaceful, and gives teams and individuals the autonomy to find an atmosphere that works for them. This design concept can improve workplace productivity, minimise disruptions, and instil a sense of belonging.

Use this brochure discover how our products can create vibrant hubs and turn good spaces into great experiences.

# 01

## A space to greet

Make a great first impression, as soon as they walk through the door. Greeting spaces are the first opportunity to deliver a great experience. They set the tone, not only for the rest of the space, but for who you are as a brand, and how you interact with the people in your space.

## Configuration 01

The waiting area is the first point of contact with everyone that steps through the doors. It should provide a welcoming space that communicates who you are as a brand, and instils confidence in doing business with you.

The pared down aesthetic of our FourPeople stand alone sofas, chairs and ottomans allows you to create an elegant, comfortable and relaxing space in which to wait, meet and share.

## A space to collaborate

Fostering a collaborative spirit is key to success.  
Create a mixture of spaces that nurture different levels of collaboration - from impromptu meets and group presentations, to virtual catch-ups and creative conversations. It's in these spaces that ideas come to life, goals are achieved and experiences are shared.

## Configuration 05

For those bigger collaborative meetings why not try our FourPeople modules with high back which gives the sense of being in a private meeting space without the formality.

Add a FourReal AV to make it a hybrid meeting with colleagues attending virtually, or whip it round and allow creativity to thrive with a whiteboard space for ideas - it's on castors making it easy to move!

## A space to meet

Even in the most open of offices, spaces that offer varying degrees of privacy are paramount. Whether it's a catch up with a friend, a team huddle or a quiet 1-2-1, there's a safe space for every need.

## Configuration 08

Meeting spaces can sometimes feel a little claustrophobic, however the FourPeople sofa hut with straps is an innovative design that provides a level of privacy without feeling shut out. Perfect for when you want to step away for a while but still see and hear what's going on.

## A space to focus

As much as we love collaboration, everyone needs a space sometimes to just put their head down and get the job done. These clever spaces provide an environment that allows the user to feel immersed in their work.

## Configuration 12

A healthy workforce is a happy workforce. Giving individuals the opportunity to move around the workspace and between sitting and standing allows them to take care of their health and shape their workplace experience to their needs.

## Configuration 17

The beauty of a flexible working environment is that you can configure your space to suit your needs that day. However that may mean at times you don't need all of the furniture in the room!

Most of our solutions have been designed to be easy to move and store away perfectly, using a minimal footprint. Bespoke trolleys for each product aide the manoeuvrability and give peace of mind that workers will be safe while moving furniture.
