

Scala Wall Panel

Design Anya Sebton

Scala Wall Panel

Scala sound absorbing panels – a playful paraphrase on corrugated iron that simultaneously employs the functionality of the shape.

"The inspiration comes from the many houses in Iceland, where not only the roofs, but the facades too, are covered by corrugated iron. It gave birth to the idea of bringing it into the space", explains award-winning designer Anya Sebton.

Specifications

The wall-mounted sound absorber is available in different sizes. Portrait or landscape format, to be hung on hidden wall brackets.

Note: We recommend having a small gap between joins to keep panels in line.
