Developing Positive Sound

For many years we have been promoting the benefits of good acoustics. We have worked with leading acoustic experts, offered a great product range and provided acoustic RIBA accredited training to hundreds and hundreds of architects, dealers and end users.

But we wanted MORE...

A good acoustic environment can improve effective interaction, create a positive setting and aid wellbeing. Poor acoustics reduces productivity, hinders enjoyment and increases stress - acoustics is about emotion.
We have been on a development journey to create a new positive and comprehensive acoustic solution.

Why Positive Sound

Products that are part of the **Positive Sound** collection are marked with the icon above.

Acoustics is about emotion...

People:

Sound impacts on whether people have a negative or positive association with a space. A positive soundscape improves our effectiveness, aids our wellbeing and increases our enjoyment of a space. A negative acoustic environment inhibits our productivity, reduces our comfort and increases stress.

Place:

We must consider the place and its function to create an appropriate acoustic solution. Equally, the acoustic products should enhance the palette of the interior designer and not restrict the visual integrity of the scheme.

Purpose:

We can accept different soundscapes if they are appropriate to the task: the buzz of a breakout canteen encourages us to socialise and relax, whereas the same noise level would be disruptive in an office work area. The acoustics of an environment have to be appropriate to the purpose of the area.

Technical

Class A
Full testing documentation
Clearly presented technical data

Creative

More choice
More shapes for endless configurations
Over 100 different colours available

Comprehensive

Acoustic solutions specifically designed for different functions and areas

Cost-effective

Superior acoustic properties means less product is required for optimum results.

Supported

More support for specification
Free space planning
Education programmes
RIBA CPDs
Advice from highly qualified acousticians
4 week delivery times

Environmental

100% recycled content

Simple to specify and install

New adjustable fixing system
Easy to follow price list

Expert Advice

To help you easily identify the acoustic properties of a product, an acoustician has provided clear descriptive icons.

ICON A – Absorb

This product is acoustically absorbent and reduces the reflection of sound off hard surfaces.

ICON B – Block

This product is suitably dense to reduce the transmission of speech sounds from one area to another. Creating barriers to sound disrupts the sound path which means that sound travels less efficiently across the space.

ICON D – Divide

Individuals performing different tasks have different requirements, making it important to design effective working zones. It is critical to place areas of quiet contemplation away from noisy and disruptive zones. Visual and acoustic separation can be used to signal the function and behaviour appropriate to each space.

ICON Speech Privacy

Distraction distance is perhaps the most important measure in open plan office acoustic assessments. When someone speaks, a certain number of people around them will be able to hear them clearly and will most likely be distracted by them. Use this product in conjunction with others to reduce distraction distance and improve speech privacy.

Products that are part of the Positive Sound collection are marked with the icon above.

ICON C – Cover

This product creates a pleasant, easily ignored sound that can be used to elevate background noise levels to reduce distraction and improve privacy.

ICON Reverberation Control

Rooms with too much reverberation (echo) can be uncomfortable and normal conversation may be difficult. Additional absorption is required to reduce reverberation by preventing reflection off hard surfaces. Use this product, along with others, for the control of reverberation at speech frequencies.

ICON Visual Privacy

Visual distraction can be detrimental to our focus and concentration. In addition, our abilities to read visual cues help us to understand speech better and so increase the potential for distraction. Use this product to reduce visual distraction or improve visual privacy.
